

The Joseph Parr Group operates in the United Kingdom and is made up of seven builders' merchants. The Group buys and sells building materials and delivers these to their customers within the United Kingdom. This Environmental Policy Statement applies to all subsidiaries and has been signed to demonstrate Senior Management support.

As a responsible supplier, we take care to protect and mitigate our environmental impact. We will be working with our affiliated companies, within the Joseph Parr Group, to ensure that we continue to develop and improve our business and service.

We monitor and aim to improve our services to all of our customers by recognising and understanding environmental legislation and its application within our industry sector. We aim to minimise pollution by controlling and providing mitigation for any negative impact on the environment which occurs as a direct result of our business. We aim to do this primarily by sensibly ordering, providing accurate guidance and by managing our energy and fuel use with a view to reduce consumption.

We actively use journey planning and real-time traffic information to make informed decisions about our delivery routes. In addition to these larger concerns we also appreciate that the local areas are equally important and we will mitigate any environmental impact at source; for example by wheel washing before leaving external sites and regularly maintaining our vehicles to minimise oil leaks, therefore reducing possible contaminated run-off.

We will introduce 'paper-less working' as much as practicable to minimise our paper waste from our branches. In addition, we recycle consumables and packaging where possible, our waste is separated by our waste contractor and as a result minimal waste is sent to landfill.

We will order, whenever possible, sustainable products such as FSC® and PEFC registered timber. Our certificates are available upon request, please check with the branch before ordering.

Lastly, we would like to show our support to our customers. We are very proud to work with sustainable contractors and reputable companies who act with attentiveness and implement sustainable solutions. Our promise to our customers is that we will strive to combine our environmental considerations into all aspects of our business with the aim of providing the best possible service.

The support of our managers is critical to the implementation of this policy. By signing below you agreed to act with integrity and will give your support to our environment policy statement.
